did you know...

Syphilis infections are common and easy to diagnose and treat.

Having syphilis when you are pregnant can have serious impacts on your baby.

Getting tested is done with a simple blood test.

Your prenatal healthcare provider (Doctor, Midwife, or Nurse Practitioner) will order a test for you.

You can request a syphilis test at any time.

Syphilis infections are on the rise!

GETTING TESTED *and*
TREATED EARLY *in your*
PREGNANCY HELPS KEEP
YOU *and* YOUR BABY **SAFE**
